Log #064 Akran Laboratories year 2048

We finally got funding for our project on what the boss likes to call “The Arkan Project” which is designed to be a biological weapon that is to be used on the rebels, a biological weapon meaning a living breathing force to create mass destruction. Hopefully this war can end soon and we can stop losing people to the war. I don't know how buying out a company for 12 million dollars counts as a “company expense” but the boss says it's extremely important, so much so that it came out of his pockets. Too bad we had to wait this long for the government to green light our project. Well anyway I'll keep you guys updated Anderson out.

Log #165

Julius has not been acting like himself recently. He seems incredibly worried about something but he's good enough at covering things up but no one seems to notice. I mean I get that the Arkan Project is a bit scary when you really think about it but is it really something we need to be afraid of?

Log #206

The day of the first test is upon us brothers today we know if we win or lose. Ok we're firing it up (light static) oh my god it's moving. IT'S MOVING YES!!! (BANG BANG BANG) ...maybe a little too much, definitely too much, SHUT THIS THING DOWN! Sir we can't, the tranquilizers aren't having an effect. Keep your guns trained on it and hopefully it doesn't break out.

Log #224

Anderson again the first test was a... Well, let's just say we think we can get it under control. It slammed itself into the glass for about 10 minutes before it knocked itself out. Put a serious crack in the glass and the power has been on/off since the test.

Log #236

Hello listeners, it's Steve again we're killing most of the infected but I swear I've been seeing the same ones over and over again and we have had no decrease in the resistance. Maybe it's just my imagination but it- wait what are you doing NO DON'T KILL HIM...(gunshot) NO NO! no please god please be alive please be alive NO... it's all your fault I won't let you live. (second gunshot)

Log #301

(Steve) Me and 4 others have created D.A.W.N. Development of Advanced Weaponry and Nanotech, we're starting development with a high powered railgun capable of blasting through multiple enemies and we need 20,000 by the end of the month or sooner if possible we've managed to intercept an official arkan distress beacon. Sounds like the whole country's fallen into chaos even the rebels are fleeing if you couldn't tell this is really bad.

Log #312

(Steve) Bodies are filling the streets and most of our men are either badly hurt physically or mentally. But fortunately I've been developing our second project, a me-AHHHHH(heavy static followed by gunshots and lots of groaning.)

Log #325

Steve got hit in the forehead luckily he survived but unfortunately we're not getting experiment 02 he was the only one who knew it's whereabouts. He always hated when he got shut down so he made things so far into development without us knowing that we couldn't say no to anything he came up with. Well I better get back to him because he's not doing great.

Log #329

Steve unfortunately didn't make it and Benjamin, who's on survivor search, hasn't been back for days. Something bad probably happened to him so it's just us three for now probably forever I hope this gets better soon.

Log #346

Me and the rest of us have just finished experiment 03 the development of a high powered modified stock military sniper rifle that uses a battery to hyper accelerate the bullet. And to make sure it doesn't blow your shoulder off I created a high absorption fiber to take some of the recoil. And if you shoot it right blows the infected sky high leaving nothing behind but twigs and leaves. I'll keep you guys updated on how things are going

Log #368

They're gone. They're all gone, Steve, Benjamin AND EVERYONE ELSE. It was my fault I made them do this, well I started this mess and I'm going to fix it. If It's The Last Thing I Do.

Log #379

I made a high tech pistol using some of the tech from the railgun and now I'm going to kill all that I can. Why did I do this, this wasn't supposed to be A BLOODBATH. So many have died from my ignorance I'm going to end my creation and EVERYTHING IT MADE! (gun cocks)

Log #402

I'm moving on to experiment 05 a katana/sword like weapon that can harness kinetic energy and use it against the enemy. I really hope this works.

Log #427

I've done it, something top scientists have tried to make for years I ma-(BOOM) (BANG BANG BANG) ARRRGH.

Log #456

I've sort of made a bandage. I was hit with something from the explosion. My last 2 experiments have been destroyed by the infected, so I have to come up with something and fast before they overpower us.

Log #471

I don't have much time to explain I'm infected since I have an open wound. I've made a laser rifle using the skills I've learned and a recycled military rifle. Hopefully this will buy me just a little bit more time.

Log #479

This will probably be my last creation but I've created a drone with guns, missiles and a flamethrower for maximum damage. I also added a claw attachment to carry things around so I don't have too. Hopefully I will live just a bit longer now.

Log #513

This is my last hurrah, the final frontier of my plan. If this doesn't work then there's no hope for anyone. I AM GOING TO KILL THIS THING NO MATTER THE CONSEQUENCES I'M ON THE CLOCK, THIS THING DESTROYED EVERYTHING THAT MATTERED TO ME. I WON'T STOP UNTIL ONE OF OUR HEARTS STOPS BEATING.
